

MTCS COLLOQUIUM

Bob Matthews

will present

English without Syntactic or Semantic Context

3:30 pm
Tuesday, February 28th
Violette Hall 1236

Our talk, we will explore common digraph and 'i'. Travesty extends the entire random text? Our talk will explore letter-only n-graph counting of its semantic or syntactic or syntactic context?

Our talk, we will explore combinations are "th", "he", "in" and general n-graph and "er". In this topic through the science of the use of cryptology is Travesty allows us to explore letter common in particular example, the use of arbitrary length n-graph, trigraphs. an understood and letter combination that some letters and 'i'. Travesty." One of written English (or any other natural letter-only n-

A de-translation of this passage will be supplied at the talk.
