

MTCS COLLOQUIUM

Tom Tegtmeier

will present

Elliptic Functions via Reflections

3:30 pm
Tuesday, March 28th
Violette Hall 1236

In this talk, I will show how you can use reflections to construct magical doubly-periodic (a.k.a. elliptic) functions. I will also show how this led to an easy solution to a potentially ugly research problem. No prior knowledge of complex analysis is necessary.
